Dear Sir,

**Ref: Anglian Water Pump Test/Licence application at Ludham Borehole.**

Further to our conversation before Christmas, I enclosed a copy of my piezometer readings from my "Ludham Road" borehole for 2003.

You will see the "blip" in the "Clarke" piezometer in week 26 (week ending 29<sup>th</sup> September).

My main concern is that my ability to irrigate my farm in the future is not jeopardized by the new pumping regime at Anglian Water's borehole in Ludham. With the Environment Agency's Review of Consents in 2006 and the CAMS process starting shortly, I feel I must make my findings known to you, so that my farming business, which relies heavily on my ability to abstract water to irrigate crops, is not put at risk.

I look forward to hearing from you.

Yours sincerely,

[REDACTED]
